

Auto-retractable Safety Insulin Syringe

m|devices auto-retractable Safety Insulin Syringes provide enhanced safety and ease of use. The needle automatically retracts into the syringe barrel immediately following injection, significantly reducing the risk of accidental needle stick injuries.

One-handed activation is achieved through a simple, continuous press of plunger to its end.

- ⊗ Automatic needle retraction for reduced needle stick risk
- ⊗ One handed safety activation
- ⊗ Bold scale markings
- ⊗ Orange cap for easy identification
- ⊗ Pre-attached needle
- ⊗ Clear barrel
- ⊗ Peel open pouch
